

DO YOU HAVE BATS OR BIRDS?

Please help and tell us if you know, or think you have bats or birds in your house (or if you have seen bats / birds coming out of another house).

- bats or birds will not prevent energy improvements being made to your home if all the information needed about wildlife and the property can be obtained
- steps can be taken to make sure the bats and breeding birds are safe (all our bats and breeding birds are protected species)
- it would just be very helpful to us if we we know that bats/breeding birds are there before starting work
- Contact the Site Manager or the Ecologist (details below)
